

Natural Organic Face Serum Recipe for Dry, Mature Skin

© [Rebecca's Soap Delicatessen](#)

Ingredients:

5 grams [sesame seed oil](#)
5 grams [evening primrose oil](#)
5 grams [walnut oil](#)
2 grams [macadamia nut oil](#)
5 grams [rosehip seed oil](#)
5 grams [babassu oil](#) (or [baobab oil](#))
9 grams [tamanu oil](#)
29 grams [jojoba oil](#) ([clear, deodorized jojoba](#) is fine)
29 grams [grape seed oil](#)
15 grams [patchouli essential oil](#)
15 grams [GMO free Vitamin E oil](#)
6 grams [rosemary extract](#)

Supplies:

[digital kitchen scale](#)
[plastic transfer pipettes](#) (at least one of each oil)
small glass pyrex measuring cup
four [1 oz. amber glass bottles with glass droppers](#)
(or two [2 oz. amber glass bottles with glass droppers](#))
[full page Brown Kraft sticker label](#)

Instructions:

Place the glass measuring cup the scale, set to measure grams and tare. Then using a plastic transfer pipette add the sesame oil to the cup until you reach 5 grams. Repeat with each oil and a

fresh pipette with the weight indicated taring after each new oil is added. Then use different plastic transfer pipettes each for the patchouli essential oil, Vitamin E, and (liquid) rosemary extract to add the number of drops indicated. Stir well.

Now use a plastic transfer pipette to slowly fill each of the four 1 oz. amber bottles with 24 - 25 grams of the serum. If using two 2 oz. bottles, fill each with 48 - 50 grams of serum by weight. Cap each with a glass dropper cap and label.

To use simply apply a pea sized amount evenly to a clean face before bed. You can also add another pea sized amount to your neck if desired. Pay extra attention to areas with wrinkles or dry spots such as around eyes. For extra love, you can also use this natural facial serum before applying makeup in the morning. You'll be amazed at how easily it absorbs without leaving any greasy, oily feeling behind.

(If you like you can also include 5 grams of [Sea Buckthorn Oil](#). I had planned to use this oil as part of this recipe but inadvertently forgot to order it. [Sea Buckthorn Oil](#) is typically used to treat damaged skin, ulcerations, scar tissue, wrinkles, eczema, and burns.)

Print Your Labels:

Now simply print page two of this PDF file for the labels for your bottles of serum. There are smaller labels for the one oz. sized bottles and the as well as larger labels for the 2 oz. sized bottles.

I printed my labels for this project onto a [full size Brown Kraft sticker label](#) from [WorldLabel.com](#). The elements used for these labels were created by [We Lived Happily Ever Blog](#). The font used is the Dutch & Harley font which can be downloaded for free, personal use at [dafont.com](#).

Once you print your labels, simply cut out with scissors, remove the backing and apply one label to each bottle.

Labels are for personal use only.

You can also find this beauty recipe online at [Soap Deli News blog here](#).
